Projects

Shaw Telecom Application Testing (Offshore)

1. Testing of Shaw's different production and non production application before and after deployments.
2. Developed an Automation script using Selenium with java and UiPath to test the START application after deployments.
3. Perform test of applications after or before the deployments.
4. Worked on Mediation zone too to manage the automated workflow runs.
5. Used JIRA to report and update continuous working on updates.

Shaw Application Deployments (Offshore)

1. Deployment of production and non production applications of shaw of any new version release through TeamCity or Jenkins.
2. Coordinating with different teams during deployment for effective/fast results.
3. Used monitoring tools like splunk, appdynamics and fiddler to validate any error in application.
4. Worked on continuous delivery in production environment through SNOW.
